Are you a health professional looking to develop your skills in clinical supervision?

Curtin’s Faculty of Health Sciences is hosting a one-day Introductory Clinical Supervision Workshop for Health Professionals.

This workshop is an opportunity to develop student supervision skills and will provide participants with a framework and model to establish an effective and durable supervision culture within health and human services orientated organisations. It will also address compliance and assessment processes specific to your profession.

Who should attend?

This workshop is designed for health professionals in the health or human services sector who take or are willing and qualified to take Curtin students on placement. Delivery of the course does not assume participants have previous experience of student supervision.

Registrations to this workshop are reserved for Physiotherapy, Midwifery, Nursing, Medical Radiation Science and Occupational Therapy professionals, as numbers are limited. Please note that additional workshops will be offered, for a range of other health disciplines, at a later date.

Learning outcomes:

By the end of the workshop participants will have the knowledge to:

- Define the purpose of supervision.
- Practice building a supervision relationship.
- Apply learning styles within a supervisory context.
- Consider stages involved in supervision.
- Explore common challenges associated with student supervision.
- Explore requirements for discipline specific student assessment.

Date: 29 August 2016
Time: 9:00am—5:00pm
Location: Curtin University, location to be confirmed on registration
Cost: Free

Lunch may be purchased on campus or participants are welcome to bring their own. Please enquire about parking availability if required.

Facilitators:
The workshop will be facilitated in two sessions. During the first session, participants will work in professional groups, facilitated by Curtin academic staff. From 10:30am, all participants will come together for the second session. This will be facilitated in an interprofessional delivery model by Kate Duncanson and Amanda McCallum.

Registration:
Registrations are now open. Please email your discipline contact by Monday 15 August 2016:

- Physiotherapy: A.Reubenson@curtin.edu.au
- Midwifery: L.Kuliukas@curtin.edu.au
- Nursing: Amanda.Mccallum@curtin.edu.au
- Medical Radiation Science: yasas.botenne@curtin.edu.au
- Occupational Therapy: sally.hunter@curtin.edu.au
