TAKORADI, GHANA **CLINICAL & RURAL COMMUNITY PLACEMENT**

Takoradi is a backpacker's paradise, with fishing villages and historical forts dotting the golden, palm-lined shores. You can spot wildlife on safari, swim in jungle waterfalls, or simply relax and soak up the sun! You'll immediately notice that resources are limited, and this makes a placement in Takoradi particularly eye-opening. In spite of the challenges, you'll see local staff work creatively to provide the best possible level of care for their patients.

In addition to your main placement in Ghana, you'll have the opportunity to spend a week in a bustling yet rural fishing village. In the mornings, you'll attend the village's healthcare centre and conduct community outreach at local primary schools. In the afternoons you'll get a culture lesson as you bring in the day's catch with local fishermen, take trips across the nearby lagoon in a locally built canoe, visit a local gin distillery, walk through the shallow sea to explore a ruined castle on an offshore island, and walk coastal trails along stretches of unspoiled beach with not a tourist in sight.

DAR ES SALAAM, TANZANIA **CLINICAL & RURAL COMMUNITY PLACEMENT**

The large Tanzanian city of Dar es Salaam is surrounded by stunning natural beauty. Spot the 'big five' on safari in Sealous Game Park, or travel to Mt. Kilimanjaro, which some of our students have climbed! Being the largest city in Tanzania, you'll experience busy wards and high patient volumes. Highlighting the realities of providing necessary care with limited resources.

In addition to your main placement in Dar es Salaam, you'll have the opportunity to become part of an African village community for a week. You'll get experience in a busy primary healthcare clinic seeing how care is provided in a rural setting. In your free time you'll take part in many local activities such as cycling to the sugar cane plantations, and learning traditional drumming and dancing.

MERIDA, MEXICO **CLINICAL PLACEMENT**

Merida is Mexico's centre of sophistication. The city is home to beautiful colonial architecture, and broad boulevards punctuated with green plazas. In Merida we partner with two contrasting hospitals - a modern, high speciality government hospital, and an under-resourced general hospital. On a placement here you'll experience many patients presenting with advanced cases having gone through a typically long and complicated referral process.

AREQUIPA, PERU **CLINICAL PLACEMENT**

Peru is abundant with natural beauty and colourful culture, from misty Amazonian rainforests and ancient mountaintop ruins, to mouth-watering cuisine and textile markets. On a placement in Peru you'll come to realise that most patients are economically disadvantaged. Despite healthcare being government funded, resources are scarce and wards are overcrowded.
